

ECOLOGY

We don't turn on the lights when it isn't necessary and we turn off the lights.

We water flowers with rain water.

We don't waste food- even the snack and lunch.

We give the second or third life to books.

We change shoes, save water.

We try to arrive at school without using cars.

We recycle waste and throw it into bins for paper, plastic, glass, cans and bio waste.

We bring our snack in boxes and own bottles.

We don't waste tissues in the bathroom.

We don't overheat, we ventilate.
